

Fixed price tool repairs

Fast turn-arounds, minimum administration costs

Atlas Copco

Satisfaction

Fixed price repairs With your operation running at full speed, you don't need delays caused by obtaining tool repair quotes and placing orders. Our Fixed Price Repairs save you time and money. They guarantee you repairs of the highest quality that optimize the performance and extend the lifetime of each tool. Our Service Boxes speed up the entire process, so your tools are back in production faster. Administration time is minimized since you know the exact cost in advance.

If you don't have a Service Box today, call our Customer Service and we will ship one directly to you.

Repaired by skilled service engineers and returned to your line with a full warranty

Fixed price repairs

- Less administration time for reduced costs
 - Faster turn-around time since no quoting process
 - Full overhaul ensures optimum performance and extended tool life
 - Clear price structure, repair cost normally 20-30% of a new tool
 - Repaired and tested in compliance with Atlas Copco's global standard
-

Fixed price repairs make perfect sense

Our fixed price tool repair agreements work out less expensive than separately quoted repairs. They also ensure faster turn-arounds and cut administration costs all round.

No unpleasant surprises

You always know exactly what your repair costs will be, how long they will take and when the tools will be back in production.

All wear parts replaced

Our unique service kits ensure your tools are fully maintained. Unlike local repair shops, we don't just replace broken parts, we exchange all wear parts.

This ensures extended tool life and optimum performance.

Report and warranty

Following rigorous testing in compliance with Atlas Copco's global performance and safety standard,

guaranteed!

The boxes contain documents with all necessary information for repair and shipment.

When the repair is complete, the tool is shipped back to you in the Service Box and can be returned to production.

the repaired tools are returned to your assembly line with a report and warranty.

Tracking of repairs

Since we monitor and store data on each repair performed in our Repair Workshops we can always provide a full repair history of your tools.

Service Boxes

Atlas Copco Service Boxes reduce the handling and administration costs

related to sending your tools to our Service facilities. They are convenient to use and contain all necessary documentation for shipment and repair.

Our highly trained service engineers are constantly updated on the latest technological developments to ensure optimum performance.

Tuned to perfection

Fully orchestrated service from Atlas Copco

To maintain the highest standard of quality in your assembly operation, you need reliable tools that perform efficiently at all times. We offer customized solutions depending on the size and type of your operation.

ToolScan RCM

Is your tool service level correct? Based on the Reliability-centered Maintenance (RCM) process, ToolScan RCM enables our fastening experts to identify your precise needs in terms of tool service. We'll help you optimize your existing service program or, if necessary, develop a new one.

Full Coverage Service Agreements

Our full coverage option that includes corrective maintenance. You delegate all service of your new tools to Atlas Copco at a fixed cost. Repairs required during the contracted period will be free of charge, unless the tool has been misused.

Preventive Maintenance Agreements

Our standard preventive maintenance program. Atlas Copco will maintain your equipment in peak condition for a specified number of years at a fixed cost, with full documentation.

ToolScan™

Identify problems before they occur. Ask for Tool-Scan™ and an experienced Atlas Copco service engineer will check the status of your tools on-site for a fixed price. A full report of the findings on each tool is provided after every ToolScan™.

Calibration Services

Let us handle your tool and equipment calibration. We have experienced personnel, state-of-the-art equipment, and accredited calibration laboratories operating in compliance with ISO 17025 standards.

ToolStart

We offer tool installation and start-up by qualified Atlas Copco engineers at a fixed price. The service also includes: Programming, test running, and operator training.

Training

Atlas Copco offers a wide range of training and seminar programs relating to tools, systems and software. Courses start with a theoretical platform, and lead to instruction on practical implementation in your business.

For more information about these services, please contact your Atlas Copco Service sales representative.

Our Service Box concept cuts administration and handling costs.
